

## **Draft work plan for the ERFp Ad hoc group for the preparation to the Tenth Session of ITWG-AnGR, Rome 27-29 June 2018**

Dear members of the ERFp Ad hoc group for the preparation to ITWG AnGR 2018,

I hope most of you will come to this meeting where we together will make preparations for the ITWG AnGR meeting in late June. The objective is not to agree on any statements, the objective is to go through the working documents for each of the agenda items and the points under the paragraph "Guidance sought". We have all experienced that it is fruitful to discuss both the documents and the questions from the secretariate to prepare best possible statements and positions. So this is what we will do. ☺

In the work plan below/next page, you will find a time table for our meeting June 13 and 14. You will see that each of us are responsible for introducing one of the items from the provisional agenda for the ITWG AnGR-meeting. I expect that the introduction will be a short presentation of the working document and the points under the corresponding Guidance sought-para. For some of the items you are two to give this short introduction, the first name shall give the introduction, the second name has a special responsibility to support and be ready to give supplementary comments or inputs to the following discussion in the group.

It will however be expected of all of us that we have studied the agenda items and corresponding documents that will be published by the CGRFA secretariate on <http://www.fao.org/ag/againfo/programmes/en/genetics/angrvent-docs.html> before meeting in Ljubljana.

Looking forward to seeing you all in June!

Best regards,

Nina
