

# Discussing user policies and access rules of national gene banks

*Martina Henning, Germany*

■ Repr. of the state ministry of Agriculture:  
Head of the State Department Animal Breeding

## Main issues discussed in the steering committee

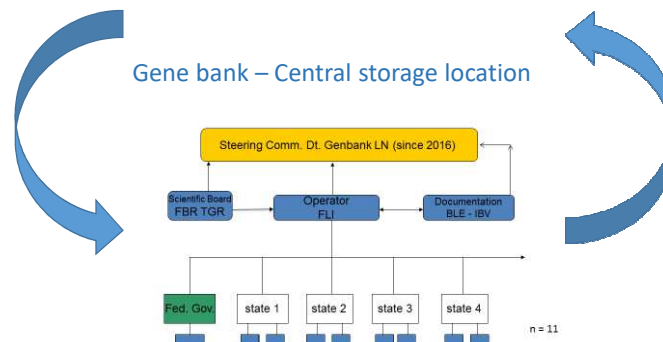

- statewise distribution of the material to be collected according to its geographic origin
- further gene bank development (quantitative- and qualitatively)
- handling of samples, which do not fulfill present sanitary requirements („historic“ samples, epididymal sperm etc.)
- **Materialtransfer/-agreements**

Owner  
(state owned, breeding ass., private)

User  
(state owned, breeding ass., private)

### Gene bank – Central storage location

## Discussion

### **MATERIAL TRANSFER AGREEMENT (MTA) FOR CONSERVATION AND BREEDING:**

*..Owner: Any legal entity or private person(s) who have the ownership of the material...*

- wording (translation.....)
- ownership
- liability
- complexity of the contract
- 4 pages agreement/contract between state and genebank operator (FLI)

**Thank you for your attention!**
