Questions/topics related to GenRes Bridge

- Why do we need strategy? Good arguments, reasons/motives behind? Define key arguments? (how agrobiodiversity contributes to the human wellbeing)
- Strategy/strategies; integrated.....domain specific?
- Gaps/challenges in management and conservation of AnGR.....
- Overview of the existing strategies...(what is already there.....).
- Experts attending workshop
- Collection of examples/demonstration cases on transboundary breeds

Questions/topics related to GenRes Bridge

- Why do we need strategy? Good arguments, reasons/motives behind? Added value (sustainability, resilience, rural development) for producers and in general for society: **there is a lack of awareness/evidence of the role of agrobiodiversity → the final result of the process should be to develop of communication strategies**
- Define key arguments? (how agrobiodiversity contributes to the human wellbeing)
- Wg agrees on the implementation of strategies aiming at integrating ANGR into a general biodiversity strategy, by evidencing the potential benefits of **livestock in agroecosystems** in terms of provision of services for human well being: agroecology and ecosystem services concepts for generating added values for ANGR
- Not only local breeds in HNVP like rangeland, but a view of right breed in the right environment

Questions/topics related to GenRes Bridge

- Strategy/strategies; integrated.....domain specific
- Evidence the common traits and the differences between domains
 - Conservation
 - Existing awareness of genetic resources in different domains (producers, public and researchers)
 - Interlinkages between biodiversity and agrobiodiversity in the different domains

Questions/topics related to GenRes Bridge

- Overview of the existing strategies...(what is already there....).
- State of the world about biodiversity FAO
- Sectorial State of the world reports FAO
- Starting from the production systems/agroecosystems → agroecology
- PED idea: how to update this methodological approach to be useful for the general aim? (agro-biodiversity for human well being)
