#### 1) Update on DAD-IS/EFABIS and ITWG (R. Baumung):

ITWG AnGR is moved to the second week of December 2020 (not officially confirmed, it depends from COVID-19 evolution)

DAD-IS/EFABIS: National Virtual Nodes need translation in national own language. None of the countries with National Node send the translation in their language. Countries can still do that, but when FAO will be able to set up National Node in national language can not be promised.

Prototype of datasheet for honeybee is ready, it will be tested by the WG.

Data update: SDG reporting, SDG indicators need to be updated at least once per year.

All graphs (except SDGs) in DAD-IS are updated every 24 hours.

**2) Genresbridge: European Integrated Strategy for the Conservation and Use of crop, forest and animal genetic resources. Ad Hoc Action presented (D. Bojkovski).** D. Bojkovski presented the roadmap for the development of the two strategies: i) specific ERFP/ANGR strategy and ii) European Integrated Strategy for the Conservation and Use of crop, forest and animal genetic resources. E. Sturaro present the idea of the meeting in program in Padova (Italy) November 24<sup>th</sup> -26<sup>th</sup>. The definitive program will be communicated soon (it depends from the evolution of COVID-19).

The WG propose to have another online meeting to discuss the first draft of the European Integrated strategy when available, the proposed date is the first week of July. D. Bojkovski will communicate with the WG Chair to set up revision of the Strategy and after reading meet online with the WG.

**3) Ad Hoc Action: Transboundary breeds in Europe. Promote concerted action between countries (E. Charvolin).** The WG agree to extend the *Ad hoc* action to other breeds as well (not only endangered). The idea is to move from FAO/DADIS definition and list of transboundary breeds and to explore potential improvements. The Ad hoc action can involve another member of the WG: proposals for collaboration can be sent by email to Eleonore and Enrico by the end of May. Also suggestion for stakeholders and demo-cases are welcome. All members are invited to prepare the cases of transboundary breeds in their countries and send them to E. Charvolin and E. Sturaro by email.

**4) Outcomes of the Ad hoc action "Development of specifications for a modern gene bank documentation software (CryoWEB 2.0)" (Z. Ducheve).** The presentation of the results of the Ad hoc action is available and the report will be available soon.

**5) Training on data quality and completeness in EFABIS/DAD-IS: discussion on the activities scheduled in GENRESBRIDGE Project (Z. Ducheve – E. Sturaro).** This activity is part of the GENRESBRIDGE project. It is a participatory process to improve the quality and completeness of EFABIS. The training is scheduled in spring 2021 in Bulgaria.

**6) Election of the Chair for 2021-2023.** Enrico Sturaro has been elected as Chair for another term (unanimity).

#### **7) Workplan for 2021**

- Feedback to FAO on DAD-IS/EFABIS
- Contribution to Ad hoc action on transboundary breeds
- Contribution to GENRESBRIDGE project: strategies and training on data quality/completeness
- Presentation on Mediterranean AnGR: documentation, cooperation...

**AOB:** the steering committee will meet at the beginning of June to define how to organize the Annual Assembly of ERFP.

**The meeting ended at 12.30.**
