
European Regional Focal Point for Animal Genetic Resourceswww.animalgeneticresources.net

Activities in the past year and output/results

1. The WG actively collaborated with FAO with feedback on EFABIS/DAD-IS tools and reports.
2. assistance to FAO to develop the prototype for Honeybees data implementation in DAD-IS/EFABIS. The prototype was developed with inputs from a specific ad hoc action and it is ready; it will be tested during 2021
3. Transboundary breeds: joint activities with the other WG of ERFP to improve data quality, harmonization and completeness. A specific ad hoc action has been developed and approved last year. It will involve members of the three WGs.

Plans and priorities for the next year 2020-2021

Contribution to GENRESBRIDGE project:

1. Contribution to development and revision of the GENRES strategies (inter-domains and ANGR specific strategy)
2. Training on data quality/completeness (TASK 4.1 of GENRESBRIDGE project).
 - A specific training workshop will be organized in Bulgaria in late spring 2021 (in case of COVID limitations it will be online).
 - All NC/data providers will be invited
 - Z. Ducheve as teacher
 - Relevant topics: interoperability between databases; data quality and completeness

Plans and priorities for the next year 2020-2021

Mediterranean AnGR: documentation, cooperation with NCs from Mediterranean Basin

- this activity is in cooperation with EAAP WG on Mediterranean Livestock Farming systems, and it is based on desk research and online meeting.
- The workshop proposed last year was not possible for several reasons
- An abstract has been prepared for EAAP
- The group is working on-line
