Aims of WG Information and Documentation

- The documentation of AnGR is one of the main targets of the GPA and an important basis for informed decision-making by countries, at European region (ERFP) level and at global level (FAO).
- Countries are supported by the ERFP Working Group Documentation and Information in the establishment of their national inventories for AnGR.

Activities 2023 -2024 (1)

Regular activities: collaboration with FAO, NCs and other members of ERFP to support data entry on DAD-IS/EFABIS (Chair)

⇒ Particular Year ! SOW III

- Cyprus : during the Working Group, and the Mediterranean workshop
- Workshop organised with FAO for providing help on implementing the SOWIII
- Analysis of problems (at country level) in providing data
- Training workshop – FAO - SOW

EAAP
European Federation
of Animal Science

Plans and priorities for the next year (to be formally approved by Assembly)

- ⇒ Enhancing the shared work with EURC in the frame of indicators : implementing the proposition from EURC in EFABIS, proposing collaboration to EURC based on EFABIS data.
- ⇒ Establishment of regular process for reporting on the status of data quality and completeness/progress in EFABIS

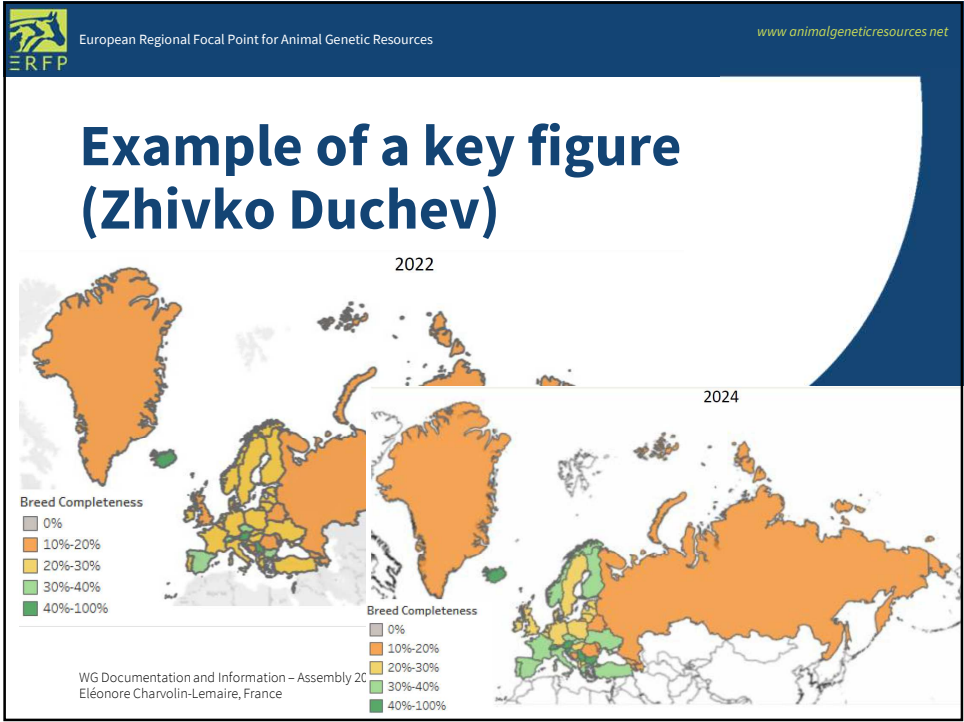

Link with AHA?
- ⇒ proposing key figures explaining showing progress made every year, **key figures for promotion of ERFP work, using EFABIS**. Link with a Communication group.

New AHA ?
Need Volunteers to participate/coordinate
- ⇒ Links with in situ WG around Transboundary breeds.
- ⇒ Preparing a second Seminar with EAAP-Med WG in 2026
- ⇒ Regular activities promotes implementation of EFABIS
