

European Regional Focal Point for Animal Genetic Resources

TASK FORCE ON DOCUMENTATION SOFTWARE FOR GENE BANKS.

29th August 2024.

Zhivko DucheV. TF Co-Chair.

Sipke Hiemstra. TF Co-Chair.

Fernando Tejerina. TF Co-Chair.

1

European Regional Focal Point for Animal Genetic Resources

Summary of TF Initial Objectives

- Establish common requirements for animal genebank database software.
- Recommend a database software for genebanks.
- Support each other in the implementation of the database software.

Permanent TF

- Analyze the operation of the solutions implemented.
- Maintain and further develop of the database recommended and promote the incorporation of new countries to the TF

2

European Regional Focal Point for Animal Genetic Resources

TF Members.

- Zhivko Duchevev – ERFP (TF Co-chair).
- Sipke J. Hiemstra – The Netherlands (TF Co - chair)
- Ina Hulsegge – The Netherlands
- Annemieke Rattink – The Netherlands
- Delphine Duclos - France
- Danijela Bojkovski – Slovenia
- Tina Flisar – Slovenia
- Daniela Wasem – Switzerland
- Melissa Raemy – Switzerland
- Fernando Tejerina – Spain (TF Co-Chair)

OPEN TO
ALL ERFP
COUNTRIES

3

European Regional Focal Point for Animal Genetic Resources

TF 2023-2024 Activities.

VIDEOCONFERENCE 4TH MARCH:

1. TF members + 8 “EXTERNAL” attendances.
2. Share experience on the implementation of new software in genebanks.
 - Implementation of Biolomics data base in CGN Wageningen. Ina Hulsegge/Annemieke Rattink.

BioAware
Life Sciences Data Management Software

- Implementation of at home designed data base in the NGB of Spain. Sonsoles Zabala.

4

European Regional Focal Point for Animal Genetic Resources

TF 2023-2024 Activities.

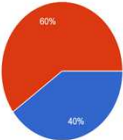

VIDEOCONFERENCE 4TH MARCH:

3. Discussion on:

- Storage and management of genomic information in genebanks:
 - QUESTIONNAIRE (10 ANSWERS):

Is your institution storing genomic information?

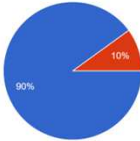

10 respuestas

Response	Percentage
Yes	60%
No	40%

Do you think it is interesting that the ERFP works on analyzing and improving the management of genomic information in genebanks?

10 respuestas

Response	Percentage
Yes	90%
No	10%

- Example from Slovenia.
- Proposal to work on genomic data by The Netherlands.

- Common format for data exchange within different databases: not a priority at this moment.

5

European Regional Focal Point for Animal Genetic Resources

TF 2023-2024 Activities.

VIDEOCONFERENCE 4TH MARCH:

4. Activities for the next year:

- Support countries in the implementation of new databases software for genebanks, with main emphasis on the database Biolomics.
- Analyze and search for common solutions for the storage, management and use of genomic information in relation to genebank collections in collaboration with the initiatives in this issue.
