European Regional Focal Point for Animal Genetic Resources

[www.animalgeneticresources.net](http://www.animalgeneticresources.net)

## Main outcomes

- There is progress !!!
- Ad hoc actions have been quite effective to tackle some issues
  - ✓ Monitoring: mainly linked to Z. Duchev's work.
  - ✓ Communication: AHA outcomes to help awareness
  - ✓ Ex situ / In situ: recent AHA / to be finalized
- Implementation of the EURC EAB also helped to achieve some deliverables
- Main needs for improvement:
  - ✓ Policy = follow of the GR strategy for the Europe region
  - ✓ Fundings: lack of calls for research on genetic resources at EU level
- Ideas for new AHA that will be analysed / SC + WG chairs
