

How is AnGR management and conservation included in the national legislation?

Meeting
Working Group In
situ conservation
6th/7th May 2025
Athens
Danijela Bojkovski/
Holger Göderz

1

European Regional Focal Point for Animal Genetic Resources

www.animalgeneticresources.net

Basis

Meeting of the WG In situ conservation 23rd/24th April 2024, Nicosia

- Presentations from Slovenia and Germany
- Discussion showed that this topic is interesting and should be further investigated
- Included in the WG workplan for 2024/25
(Approved by the General Assembly in August 2024)

2

European Regional Focal Point for Animal Genetic Resources

www.animalgeneticresources.net

Questionnaire

Questionnaire to ERFP network

- Notice, that focus is on legal regulations (not on programmes etc. without a legal status)
- Sent out to ERFP network (NCs and experts of all 3 WGs) on 10th April 2025
- (First) deadline for submission 23rd April 2025

3

European Regional Focal Point for Animal Genetic Resources

www.animalgeneticresources.net

Questionnaire

Questionnaire to ERFP network

- Differentiation between regulations concerning
 - Monitoring
 - Conservation
 - Sustainable use
- Breeds included by the regulations
 - Native
 - Locally adapted
 - Exotic
 - Other

4

European Regional Focal Point for Animal Genetic Resources

www.animalgeneticresources.net

Questionnaire

Questionnaire to ERFP network

- State driven in situ in vivo conservation
- Regulations for recognition of breeds and breeding programmes
- International cooperation
- General comments

European Regional Focal Point for Animal Genetic Resources

www.animalgeneticresources.net

First conclusion

- In situ conservation/management of AnGR is mostly included in national legislations of participating countries
- legislations on agriculture in general or special legislation on livestock/animal breeding
- Sustainable use less than conservation and monitoring
- Conservation of native breeds is mostly indicated aspect

15

European Regional Focal Point for Animal Genetic Resources

www.animalgeneticresources.net

First conclusion

- Monitoring usually for all breeds in the country
- Maintenance of national databases is mostly regulated by law, but not the exchange with DAD-IS/EFABIS
- Participation in international AnGR networks is regulated in approx. Half of the participating countries
- General problems identified:
 - Networking/connection between actors in the countries
 - Stronger commitment for conservation and sustainable use of AnGr needed
 - Funding
